“Novel Directions for Spintronics: Spin-orbitronics and Magnetic Skyrmions”

Dr. Fert is the scientific director of Unité Mixte de Physique CNRS/Thales and a member of the French Academy of Sciences, with research focuses in metals, magnetism, magnetic nanostructures, and spin electronics. His discovery of giant magnetoresistance earned the Nobel Prize and launched the field of spintronics, revolutionizing the electronics industry.

Monday,
November 4, 10 a.m.
