Refer to "SD Geography Convention"

Convention History:

The South Dakota State Geography Convention began in 1970 and is the longest running student organized geography convention in the world! The Convention features 7-10 distinguished speakers in the field of geography as well as showcasing student research. We have a history of attracting top geographers, including 22 Presidents of the AAG and more recently geographers such as John Fraser Hart, John Hudson, Derek Alderman, Eric Sheppard, Alexander Murphy, Fred Shelley, Joseph Kerski, Phil Gersmehl, Clark Archer, and many others. The scale of our convention allows for increased interaction between students and respected professionals.
