

David L Nieland

Subject: Delaware Coastal Programs-DNERR Research Coordinator

This position serves as the lead for all research and monitoring for the Delaware National Estuarine Research Reserve and Coastal Management Program. The Research Coordinator will be responsible for overseeing and conducting applied coastal resource research that increases understanding of coastal and estuarine ecosystems and informs their stewardship. This position will contribute to inter-agency partnerships and work with multi-disciplinary teams of scientists, natural resource managers, educators, and trainers to design and conduct ecological research and monitoring.
