

David L Nieland

Subject: PhD position in tourism analytics (climate change impacts; Big Data analytics) at the University of Florida

Looking for a motivated, quantitatively proficient student to work on analysis of (1) climate change impacts and (2) user-generated content (blogs, photographs, mass media) in relation to tourism. Strong preference will be given to students with quantitative skills such as computer programming, web analytics, Big Data analytics, statistics, and/or GIS.

Funding includes a nine-month Research Assistantship with tuition waver.

Interested students please send Dr. Andrei Kirilenko the following: (1) statement of research interests (2) CV, and (3) contact information for three potential references. Suitable candidates then will be asked to submit an online application for graduate studies. For details see
