**Subject:** Botany Workshops, Isle Royale National Park (in Lake Superior), June 6-11 & Sept 6-11, 2016

Join us for either the spring or fall 2016 botany workshop in Isle Royale National Park (these workshops are sponsored by the Isle Royale & Keweenaw Parks Association). The first botany workshop on this incredible Lake Superior island was held in 2007 and they have taken place every year since.

JUNE 6-11: at Rock Harbor, Isle Royale (most easily accessed from Houghton, Michigan)

SEPTEMBER 6-11: at Windigo, Isle Royale (most easily accessed from Grand Portage, Minnesota)

These botany workshops are open to anyone with beginning/intermediate knowledge of plant identification who would like to learn to identify the plants of Isle Royale with tools such as a dichotomous key and hand lens. Plant communities, rare species, ecology, and invasive species will be discussed.

To learn more about these two botany workshops (and a photography workshop) on Isle Royale, visit: <http://irkpa.org/get-involved/workshops> If you have any questions, please contact either Kristine Bradof at [kbradof@irkpa.org](mailto:kbradof@irkpa.org) or Janet Marr at [jkmarr@mtu.edu](mailto:jkmarr@mtu.edu)
