**Subject:** MSc or training project in northern Finland

I am looking for 2-3 students to do a Master's thesis project or practical training in plant ecology in my PhD project in northern Finland. I am studying plant phenology, growth and stress in a natural snowmelt gradient. This is not an ITEX project but it would be great if you could distribute this ad at your institutions!

Funding for student travel and accommodation is applied for (decision pending) and students can apply for further grants themselves (e.g. student grant from the Finnish society Vanamo). I budgeted travel costs from Helsinki but if the budget allows I would cover as much as possible.

Thank you very much! Happy researching!

Best wishes,

Friederike
