

David L Nieland

Subject: Two-week freshwater algal identification course -- June 15 - June 29, 2016

This summer we are offering a 2-week field course on freshwater algal identification: June 15 - June 29.
Location: The Louis Calder Center - Biological Field Station of Fordham University, in Armonk, New York (USA).

The area offers a diversity of aquatic habitats with numerous, lakes, ponds, marshes, bogs, streams, and rivers, as well as a meso-eutrophic lake at the field station for detailed studies.

The station is well-equipped with microscopes, incubators, and aquatic sampling equipment.
A few details:

- Intensive, two-week field course (3 credits; or a no-credit option)
- Dates: June 15-29, 2016
- Each day will provide lecture--‐discussion, field sampling, and lab experiences -Classes meet daily for 8 hours/day (with lunch break) -Lecture and discussion in the morning / lab and field work in the afternoon -Housing is available on site

Full details, costs, and registration links are available at:
