

David L Nieland

Subject: Undergraduate Summer RA in Marine Ecology & Oceanography APPLY BY MARCH 7TH

Just a reminder that If you have an undergraduate or recent graduate interested in a **paid research assistantship in Marine Science** this summer please pass this information along! There are two positions available and **applications are due March 7th**. An assistantship would involve a combination of field and lab work in population ecology and oceanography, would be based just an hour north of Portland, Maine, and would involve multi-day trips to Maine's Acadia region.

Here is the link for the flyer (<http://www.downeastinstitute.org/assets/DEI%20Sm16%20RA%20Ad.pdf>) but **for more information email Phil Yund** (pyund@downeastinstitute.org).

Best,
Scott Morello
