

Subject: NSF REU Summer Position- Michigan State University

NSF REU Summer Position- Michigan State University

A position is available with the Zarnetske Spatial and Community Ecology Lab studying "Climate Effects on Species Interactions in Terrestrial and Aquatic Systems."

Summary: The student will gain hands-on experience with field experiments in both terrestrial and freshwater systems at two LTER sites at Kellogg Biological Station in southwestern Michigan. Responsibilities will include assistance in field- and lab-based data collection as well as set-up of an aquatic long-term ecological experiment. The student will be responsible for working ~40 hours/week from May-August, 2016, exact dates TBD. This is a paid position that includes housing, meals, and funding for travel and research expenses.

For information about how to apply, visit the Spatial and Community Ecology Lab website: <http://communityecologylab.weebly.com/opportunities.html>

Please send applications to Dr. Phoebe Zarnetske, plz@anr.msu.edu
