**Subject:** Content Manager Position- Climate Change Resource Center

The Northern Institute of Applied Climate Science and Michigan Technological University are advertising for a Content Management position based in Houghton, MI and focused on the Forest Service-led [Climate Change Resource Center](#) (CCRC).

The CCRC is an online platform for providing information to natural resource managers concerning climate change impacts on ecosystems, and approaches to adaptation and mitigation in forests and grasslands. The Content Manager will oversee the ongoing development of the website as a high-quality resource for land managers. The Content Manager will coordinate the activity of the CCRC Production Team; manage the creation, editing, and review of content for online audiences; implement content changes in a Drupal-based platform; help coordinate technical work; and conduct outreach and publicity for CCRC resources. The new position will work as a staff member of the Northern Institute of Applied Climate Science (<http://www.nrs.fs.fed.us/niacs/>). Questions about this position can be directed to Chris Swanston at [cswanston@fs.fed.us](mailto:cswanston@fs.fed.us).

Please see more details and apply through Michigan Tech: <https://www.jobs.mtu.edu/postings/3987>. Michigan Technological University is an Equal Opportunity Educational Institution/Equal Opportunity Employer, which includes providing equal opportunity for protected veterans and individuals with disabilities.

More information about the Northern Institute of Applied Climate Science (NIACS) can be found at [www.nrs.fs.fed.us/niacs/about/](http://www.nrs.fs.fed.us/niacs/about/). NIACS staff members currently include employees of the U.S. Forest Service and Michigan Tech.

### HOUGHTON, MICHIGAN

The position will be located on the campus of [Michigan Technological University](#) in Houghton, Michigan. Houghton is located on the scenic Keweenaw Peninsula, rated by National Geographic Adventure Magazine as one of the top 10 outdoor adventure spots in the country. Proximity to Lake Superior and extensive forests, lakes, and rivers provides opportunities for a range of recreational activities, including hiking, canoeing and kayaking, fishing, and hunting. With an average of 200 inches of snow each year, cross - country and downhill skiing, snowshoeing, and other activities keep residents active and outside all winter long. Houghton has been ranked as one of the [100 best places to live](#).
