

Subject: Assistant Professor of Ecology, Department of Forestry and Environmental Resources,
NC State University

- **Assistant Professor of Ecology (Department of Forestry and Environmental Resources):** Ecologist who can work to address the pressing challenges of urban ecosystems related to water availability and quality, watershed processes and landscape patterns, and/or environmental technologies for monitoring and assessment. Ability to work across disciplinary boundaries and experience or strong potential to work in interdisciplinary teams that consider the feedbacks among policy, planning and human health.
- This is one of three full-time tenure-track positions that The College of Natural Resources at NC State University is inviting applications from innovative, interdisciplinary scholars for. The appointment is anticipated to begin on August 16, 2016. Review of applications will begin February 22, 2016, but will continue to be received until successful candidates are identified.
