

Subject: Fish Migration Symposium - submissions welcome

A symposium entitled "Fish Migration Ecology: Patterns, Mechanisms & Consequences" will be held at the 12th International Congress on the Biology of Fish in San Marcos, Texas. This Congress will take place June 12-16 on the campus of Texas State University.

The Fish Migration symposium description is as follows:

"Little is known about migratory patterns, the mechanistic drivers, or the ecological consequences of migration for most species of fish.

Physiological adaptations that underlie migratory behaviors, novel methods used to unravel migratory histories, and consequences of migration for population dynamics and ecological processes will be covered. Presenters that use a variety of methods, alone or combination, including molecular and genetic assays, otolith chemistry and tissue stable isotopes, satellite and acoustic telemetry, and beyond are encouraged to participate."

Abstract submission and registration is now open, with abstracts due by MARCH 31st 2016. Further details about the Congress and abstract submission can be found at:
