

## David L Nieland

---

**Subject:** MS in ENVIRONMENTAL SCIENCE at VILLANOVA

The Department of Geography & the Environment at Villanova University has a new Master of Science in Environmental Science with enrollments beginning in Fall 2016. Our faculty specialize in ecosystem studies that span the coastal and inland environments, with on-going research projects in the northeast and the around the world. Our program uniquely offers the opportunity to develop geospatial technical skills that are highly marketable and sought-after by employers. We have thesis and non-thesis options, that can be completed within two years or part-time by working professionals. For more information, please see our website and contact Dr. Lisa Rodrigues ([lisa.rodrigues@villanova.edu](mailto:lisa.rodrigues@villanova.edu)), Graduate Program Director.
