

Superschool on derived categories and D-branes

July 17-23 2016, University of Alberta, Edmonton, Canada
people.math.sc.edu/ballard/conferences/superschool16/

Mentors

David Favero (Mathematics,
University of Alberta)

Eric Sharpe (Physics, Virginia
Polytechnic Institute and State
University)

Superschools focus on topics at the interface of Mathematics and Physics. Graduate students and early career researchers will be guided, in an intense week-long summer school, by the mentors. Persons from under-represented groups are especially encouraged to apply.

Organizers

Matthew Ballard (University of South Carolina)
Charles Doran (University of Alberta)
David Favero (University of Alberta)

Support provided by

Pacific Institute for the Mathematical Sciences
National Science Foundation
University of South Carolina
