

David L Nieland

Subject: Full Time Ecology Lab Technician Position

I am hiring a full time research technician based at the University of California Riverside for a one year appointment starting in June 2016.

Responsibilities include a combination of field and laboratory activities in support of ongoing projects by postdocs, graduate students, and undergraduates in the lab. The position also features some interactions with citizen scientists and outreach to stakeholders. The successful candidate should be highly responsible and organized, self-motivated, and able to work both independently and as part of a team. Experience with some ecological research in field and lab setting is beneficial. This could be an excellent position for someone looking for more experience before pursuing a graduate degree. To apply (or for inquiries) send Darrel Jenerette (darrel.jenerette@ucr.edu) a cover letter describing your interests and background and a current CV/resume as a single pdf.
