

From: Suzanne Tank
Subject: POSTDOCTORAL SCHOLAR in coastal margins carbon flux

We are seeking a **postdoctoral scholar** to work with members of the Coastal Rainforest Margins Research Network to develop a regional carbon flux model for the north Pacific temperate rainforest region. This position is a one-year term with a chance for reappointment. The best candidate will have a background in hydrology and aquatic biogeochemistry, and will also have basic computational skills including proficiency in programming languages such as R and/or Matlab, and programming experience for processing and analyzing data, running analytic models, and plotting results. Experience in using ArcGIS to visualize geo-spatial data would be helpful. The position will be located in Juneau, Alaska, with opportunity to travel and work with team members at other institutions as needed. To view the job posting and to apply, click [here](#).
