

From: James Bauer
Subject: Graduate Student Opportunities in Aquatic Biogeochemistry at Ohio State University

GRADUATE ASSISTANTSHIPS IN WATERSHED, RIVER, ESTUARINE AND COASTAL OCEAN BIOGEOCHEMISTRY. Research support is available starting in Fall 2017 for graduate study in carbon and organic matter biogeochemistry in the Aquatic Biogeochemistry Laboratory, Department of Evolution, Ecology and Organismal Biology (EEOB) at Ohio State University (<https://aquaticbiogeochem.osu.edu/>). Support is competitive and includes full stipend and tuition for up to 5 years for Ph.D. students and 3 years for M.S. students. We seek motivated, creative individuals to take part in new research initiatives on 1) carbon and organic matter cycling and the controls on carbon ages, reactivity, and transport between land, atmosphere, rivers and the coastal ocean and 2) the sources and ages of carbon and organic matter supporting aquatic consumers and food webs. For additional information, please visit our web site or contact Dr. James Bauer (bauer.362@osu.edu).

The deadline for applications for admission and support is December 1, 2016. Application instructions and additional information are available from the EEOB Graduate Program website (<https://eeob.osu.edu/grad/graduate-program>).
