Allen, Daniel C. graduate student position (PhD/MS) available in stream ecology at U. of Oklahoma

The Allen Lab at the University of Oklahoma is recruiting a graduate student to work on research projects related to the geographical ecology of stream and river networks. Funding is available for a PhD or a NS student via research and teaching assistantships with a competitive stipend and full tuition waiver. Successful applicants will design independent research projects for their thesis or dissertation, which would fall under the general umbrella of aquatic geographical ecology. Specific projects could range from community to ecosystem ecology; and could include (but are not limited to) questions related to biological community structure, biodiversity, food webs, or aquatic-terrestrial linkages at landscape, regional, or continental spatial scales.
