Subject: FUNDING AVAILABLE FOR ENVIRONMENTAL RESEARCH AND DEVELOPMENT

ALEXANDRIA, VA, October 27, 2016—The Department of Defense's (DoD) Strategic Environmental Research and Development Program (SERDP) is seeking to fund environmental research and development in the Resource Conservation and Climate Change program area. SERDP invests across the broad spectrum of basic and applied research, as well as advanced technology development. The development and application of innovative environmental technologies will reduce the costs, environmental risks, and time required to resolve environmental problems while, at the same time, enhancing and sustaining military readiness.

The Resource Conservation and Climate Change program area supports the development of the science, technologies, and methods needed to manage DoD's installation infrastructure in a sustainable way. SERDP is requesting proposals that respond to the following focused Statements of Need (SONs) in Resource Conservation and Climate Change:

- Advanced Approaches for Managing Individual Species and Ecosystems Across Jurisdictional Boundaries in A Non-Stationary World
- Climate Change Vulnerability Assessment of Major Habitats on and Around DoD Lands

Proposals responding to the Fiscal Year (FY) 2018 SON will be selected through a competitive process. All pre-proposals are due to SERDP by January 5, 2017 by 2:00 p.m. ET. The SONs and detailed instructions are available on the SERDP website.
