From: Shawn P. Serbin
Subject: Open PhD position in Tropical Plant Ecophysiology

The Terrestrial Ecosystem Science & Technology (TEST) group at Brookhaven National Laboratory / Stony Brook
University is currently recruiting Ph.D.
students with an interest in one or more of the following areas:

• Remote sensing of tropical forests
• Modeling tropical carbon cycle processes
• Plant physiology
• Conducting field work in the tropics

A degree in the life sciences is required, preferably in plant biology, ecology or remote sensing. Candidates with an
interest in the measurement and model representation of plant structural and functional traits and model-data fusion
are strongly encouraged to apply. Students will be supervised by Dr. Shawn Serbin (sserbin@bnl.gov) and have the
opportunity to structure their thesis research around a growing portfolio of research within the TEST group. The
successful candidate will have the opportunity to conduct research in a diverse range of field sites spanning
paleotropical and neotropical ecosystems. Financial support is available through a combination of research grants,
graduate fellowships, and teaching opportunities. Please send CV and cover letter describing research interests to Dr.
Shawn Serbin. The deadline for applicants to the Ecology & Evolution doctoral program at Stony Brook is December
1st 2016 (https://urldefense.proofpoint.com/v2/url?u=http-3A__www.stonybrook.edu_commcms_ecoevo_program_application.html&d=CwIF-g&c=Ngd-
