Postdoctoral Fellowships at SERC

The Smithsonian Institution, the world's largest museum and research complex, offers several Postdoctoral Fellowships annually to outstanding early career scientists. The Smithsonian's distinctive combination of field research facilities, museum archives, and expertise in ecology, biological conservation, systematics, and paleo-biology provides opportunities for synthetic, big-picture insights into some of the most profound issues challenging our world today; including habitat loss, climate change, and invasive species.

Scientists at the Smithsonian Environmental Research Center <https://webaccess.si.edu/OWA/redir.aspx?C=627cfe8904fb4706be546e78a19d99ec&URL=http%3a%2f%2fwww.serc.si.edu%2findex.aspx>

(SERC) on the Chesapeake Bay in Maryland conduct environmental research in temperate, tropical, and polar ecosystems across the globe. Recent research has highlighted the separate and interactive impacts of multiple global change factors on populations, communities, and ecosystems, including climate change, biological invasions, biodiversity loss, nutrient loading, trace element pollution, and habitat alteration. Insights gained in these studies will be crucial to developing science-based conservation plans that allow human societies to thrive while protecting our finite natural resources.

Smithsonian Postdoctoral Fellows receive an annual stipend of \$48,000 plus health, relocation, and research allowances. Each position is expected to run for two years, with the second year of funding contingent upon satisfactory progress. Applicants are encouraged to coordinate with a SERC scientist prior to submitting an application for this competitively-awarded fellowship. Applications are due December 1st. Please contact Professional Training Coordinator Daniel Gustafson at gustafsond@si.edu <https://webaccess.si.edu/OWA/redir.aspx?C=627cfe8904fb4706be546e78a19d99ec&URL=mailto%3agustafsond%40si.edu>, or 443-482-2217, for further details.
