

ASSISTANT PROFESSOR OF FISHERIES & AQUACULTURE

The Department of Fisheries, Wildlife, and Environmental Science at SUNY Cobleskill invites applications for 10-month tenure-track position as Assistant Professor of Fisheries & Aquaculture for Fall (August) 2017. Our philosophy is students learn best by doing; therefore laboratories are "hands-on". Facilities (new): 50,000 gal. cold water hatchery, warm-water hatchery, shellfish hatchery, 10 ponds, aquaponics, ornamental hatchery, endangered species hatchery, and environmentally controlled rooms. FWES maintains gear typically possessed by fish & game agencies. Teaching load is 25 hrs/yr including some of the following courses: Aquaculture Engineering, Marine Ecology, Invertebrate Zoology, Fish Hatchery Management, Pond Management, Fisheries Science, Fisheries Research, Production Aquaculture/Mariculture and Aquatic/Marine Resource Management. Preference to applicants with proven excellence in college level teaching, the ability to incorporate student centered research in the classroom, evidence of grants, contracts and scholarship. Ph.D. in aquaculture, mariculture, conservation aquaculture/fisheries, fisheries ecology/management or similar required. Salary: \$50,000-\$55,000. Review immediately- January 15, 2017.
