

From: Jennifer Momsen
Subject: REU in STEM Education at North Dakota State University

We are excited to announce the 5th year of our summer REU in discipline-based education at North Dakota State University. Our program is an excellent opportunity for students interested in learning and teaching of STEM at the undergraduate level. Over a 10-week period during the summer, students are immersed in a cohort of undergraduate scholars to get hands-on research experience in discipline-based education research. Students are housed on-campus and earn a \$5000 stipend.

Students may have the opportunity to present their research at a national conference with travel support from our REU. Additional travel funding is available for travel to and from Fargo for those in financial need.

Our program begins May 30, 2017 and runs through August 5, 2017. Applications due January 27, 2017.

For more information, including descriptions of potential research projects, please visit <http://www.ndsu.edu/cider/reu/>
