Subject: Job: Research Assistant in Pollination Ecology UIUC

Research Assistant in Pollination Ecology

How do bees use fragmented habitats? Dr. Harmon-Threatt in the Department of Entomology at the University of Illinois, Urbana-Champaign seeks a Research Assistant capable of both field and lab work to assist with addressing this question. This 2-year position can begin as early as January 2016 but no later than April 2017. Applicant must have a minimum of a BS in Biology, Entomology or a related field. Experience with netting pollinators, bee identification, GIS, R and field ecology are preferred but not required. Compensation will be commensurate with experience. Unfortunately, we are limited to domestic applicants due to funding.

For more information about the Harmon-Threatt Lab please visit www.life.illinois.edu/harmon or email Alexandra Harmon-Threatt aht@illinois.edu

Please submit a single PDF with a cover letter with relevant experience, CV and contact for 3 references who can be reached if necessary by December 9th to aht@illinois.edu .
