

From: Hammerschlag, Neil
Subject: Summer Research Internships Available - Shark Research & Conservation Program @ University of Miami

Dear List

The University of Miami's Shark Research & Conservation Program are seeking motivated students to apply for summer research internships.

Internship details and application can be found here: <http://sharkresearch.rsmas.miami.edu/participate/summer-research-internships>

Science & Conservation: The research mission of this internship will be to assess the ecology and biology of shark in relation to urbanization and climate stressors. Research activities will include shark abundance surveys, tagging and tracking as well as physiological sampling and associated laboratory analyses.

Internship opportunities: The Project provides immersive internships for students to gain research training and engage in scientific inquiry through participation with University of Miami scientists and staff. Participation involves scientifically sound practices and measurable outcomes in marine conservation biology.

Sea & Lab: Each research internship will be two weeks in duration, composed of both boat-based and laboratory research work at the University of Miami. The first week will primarily involve boat-based research and the second week will be primarily devoted to laboratory work.

Dates

There are two dates to choose from for the summer research internship:

Session 1 | [May 30 – June 9](#) Session 2 | [June 19 – June 30](#)

Application can be found here: <http://sharkresearch.rsmas.miami.edu/participate/summer-research-internships>
