

From: James Rotenberg
Subject: Masters of Science in Environmental Studies program - UNC-Wilmington

The University of North Carolina Wilmington is currently recruiting for the fall 2017 cohort in the Masters of Science in Environmental Studies program. The non-thesis program is an exciting, interdisciplinary curriculum focusing on linking classroom experience with hands-on fieldwork, culminating in a semester-long internship/practicum with an environmentally-related organization. Our program is both challenging and rewarding, with a high degree of collegiality among students and faculty.

MS concentrations are available in:
-Coastal Management
-Environmental Conservation and Management
-Marine and Coastal Education
-Environmental Education and Interpretation

An Individualized Concentration is also available for those who wish to design their own curriculum in conjunction with faculty.
