2017 Internship Opportunity

Shelby Center for Ecosystem Based Fisheries Management

Dauphin Island Sea Lab

Dauphin Island, AL

Description:

The Fisheries Ecology lab is seeking interns to work under the faculty direction of Dr. Sean Powers and Dr. Marcus Drymon at the Dauphin Island Sea Lab on a wide variety of projects in waters adjacent to Dauphin Island, a gulf barrier island in the northern Gulf of Mexico fringing the Mobile Bay estuary. Paid internships are available for a six-month period between March-December 2017.

Qualified applicants will have the opportunity to assist with groundbreaking studies in Fisheries Ecology in the northern Gulf of Mexico that involve a variety of fishes (bony fishes, sharks and rays) and shellfish from both offshore and inshore locales. Interns will gain experience with various sampling techniques used in fisheries research, as well as the associated laboratory sample processing.
