

From: Anna Armitage
Subject: Marine science REU at Texas A&M University - Galveston campus

Texas A&M University Galveston invites talented undergraduate students from diverse backgrounds to participate in a 10-week immersive experience in Summer 2017 to conduct semi-independent research that will address the complexities and challenges related to our world's oceans and coastal environments through OCEANUS (Ocean and Coastal Research Experiences for Undergraduates), an exciting interdisciplinary program funded by the National Science Foundation (Award Number: 1560242). Target majors include biology (evolution, ecology), physics, chemistry, environmental science, geosciences, maritime industry/commerce, computer science and engineering majors.
