

From: David Inouye
Subject: UMaine Experimental Forest Research Assistant Position

The University of Maine is seeking a full-time, two-year (with possibility of extension) soft-money professional staff position that is jointly funded by the US Forest Service Research Data Archive (70%), and the US Forest Service Northern Research Station (30%). The primary purpose is to assist both University of Maine and US Forest Service researchers to make research data available online, manage active research data, and organize research-related records archives. Typical hiring range for this position is \$40,000 to \$46,000, commensurate with experience and qualifications.

To apply and see additional details on the position, please see this url (<https://umaine.hiretouch.com/job-details?jobID=40282&job=experimental-forest-research-assistant>). Additional can be obtained by contacting Aaron Weiskittel (aaron.weiskittel@maine.edu; 207-581-2857)
