Postdoctoral Research Associate-Ecology and Evolution

POSTDOCTORAL RESEARCH ASSOCIATE, Watershed Studies Institute and Department of Biological Sciences, Murray State University. The postdoctoral associate will conduct research on life history evolution and population/community ecology, help mentor graduate and undergraduate research students, and teach one biology course per semester. Research will focus on the impacts of size structure and climate on polyphenism and resulting trophic cascades, using mesocosm experiments and analysis of long-term data sets. Ph.D. required; experience with experimental design is preferred. This is a two-year position starting August 1; salary is \$47,500/year with benefits. Murray is a highly-rated, vibrant public university with significant infrastructure and personnel dedicated to ecological research, including the Hancock Biological Station. To apply, email a letter of interest detailing research goals and experience, a curriculum vitae, several representative reprints, and email addresses of three references to Dr. Howard Whiteman (hwhiteman@murraystate.edu). Applications will be accepted until the position is filled; review of applications begins immediately. *Women and minorities are encouraged to apply. Murray State University is an equal education and employment opportunity, M/F/D, AA employer.*
