Enjoy a Day in the UT Gardens, Crossville: Plateau Discovery Gardens

UT Gardens, Crossville, affectionately referred to as the Plateau Discovery Gardens (PDG), is located within the University of Tennessee Plateau AgResearch Center. Begun in 2005 as a hands-on activity for MG intern training, the PDG and has grown into a beautiful and regionally appropriate demonstration garden that showcases not only plants but the collaboration of CCMGA volunteers with UT Extension and Research that impact the community. The garden has grown over the last 12 years to illustrate a range of gardening practices and species and hosts a wide range of educational and outreach programming for all ages and plant interests. Additionally, the PDG has hosted research in ornamental trees as well as hydrangea and ornamental grasses. Come visit and enjoy a relaxing and educational day in the PDG.
