SESYNC seeks a Research Assistant to help with computational research and publication tracking. Job duties include: research computing support on statistical software; data management assistance for resident scientists; literature reviews; maintain catalogs of research findings and opportunities on our website.

Qualifying candidates will have a bachelor's in a science-related field (natural, social, or computer science); demonstrated excellence in interpersonal and written communications; coursework or hands-on experience with statistical software (e.g., Stata, SAS), programming language (e.g., R, python), or advanced spreadsheet use.

Please consider applying or share with colleagues! Applications are due July 14. Learn more about employment opportunities on our website: sesync.us/careers.

Thanks,
Emily
