

From: Gogol-Prokurat, Melanie@Wildlife
Subject: Job Announcement: GIS Biology Technician Position

We are hiring a GIS Biology Technician to work on updating the California Wildlife Habitat Relationships Program (CWHR). Tasks are primarily focused on developing and updating range maps, life history information, and habitat suitability ranks for California species and subspecies, updating the CWHR database, and conducting training and outreach on CWHR use. This is a temporary position with 1-2 years of funding.

Job Location: California Department of Fish and Wildlife office, Sacramento, California

Applications are due Friday, August 18.

More information and application instructions can be found here:
