

From: Emily Cassidy
Subject: POSTDOC Fellowships at SESYNC

The National Socio-Environmental Synthesis Center (SESYNC) invites applications from early career scholars for two-year postdoctoral fellowships that begin August 2018. Apply by October 27!

The National Socio-Environmental Synthesis Center (SESYNC) brings together the science of the natural world with the science of human behavior and decision making to find solutions to complex environmental problems. Successful candidates will use synthesis methods to address a problem arising from, or associated with, the relationship between humans and the environment. Each fellow works with a Collaborating Mentor (scholar) of their choosing to co-develop a synthesis research project.

Priority will be given to projects that have the potential to advance understanding of socio-environmental systems, but the synthesis may be primarily social or environmental in nature, or some mix. Prospective fellows who propose the use of advanced theoretical, computational, or mathematical approaches or the use of Long-term Ecological Research (LTER) and other long-term datasets to study the structure and dynamics of socio-environmental systems are particularly encouraged to apply.

Appointments will be through the University of Maryland and fellowship awardees must be based at SESYNC in Annapolis, Maryland. The SESYNC postdoctoral fellowship provides an annual stipend, full University of Maryland employee benefits, and a small annual travel allowance to attend meetings or to meet with collaborators. Postdoctoral fellowships are awarded for a maximum of two years and include structured mentoring programs and opportunities to participate in ongoing Center activities.

The pre-screening application due date is October 27, 2017, 5 p.m. ET!
