

**From:** Li An  
**Subject:** Seeking Graduate Students

---

Dear ECOLOG-L Subscribers:

Funding opportunities exist for students who want to pursue doctoral degree in the following fields: landscape ecology, space-time analysis and modeling, human-environment interaction, land use and land cover change, geocomputation, and complexity theory (ABM as method). My extramural projects and the joint doctoral program between the Department of Geography at SDSU and the Department of Geography at University of California, Santa Barbara will have funding to support a number of doctoral students each year. Visit this [site](#) and this [brochure](#) also for more information. The admission and financial support are competitive-- please contact Dr. An at [lan@mail.sdsu.edu](mailto:lan@mail.sdsu.edu) before you send your application.

All the best,

Li
