POST-DOC in FRESHWATER ECOLOGY

The research group of Dr. Rick Relyea at Rensselaer Polytechnic Institute (RPI) will be hiring a post-doc in the area of freshwater ecology.

Of particular interest is expanding our current research on the ecological and evolutionary impacts of road salts on wetlands (from individuals to food webs to ecosystem function), with a mix of field studies and experimental work (including lab, mesocosm, and in situ experiments).

For more info on our research group, go to:

Rensselaer has a growing group of aquatic ecologists, superb facilities for aquatic research, and a beautiful field station on Lake George in eastern NY:

Applicants should send a cover letter, CV, research statement (including potential research projects), and a list of 3 references to Dr. Rick Relyea (relyer@rpi.edu) in pdf format.

Applications will be reviewed as they arrive. The desired start date is March 2018.
