Date: Friday, March 2, 2018 7:15:34 AM

Hi Brandon,

I am hoping you can send this job announcement to the southern afs listserv. Please let me know, it closes March 6! Thanks so much!!

Rachel

Good morning,

The following job advertisement is a great opportunity to work for the United States Fish and Wildlife Service. This position is a TERM Fisheries Biological Science Technician position working at Harrison Lake National Fish Hatchery in Charles City, Virginia. The facility is about 20 miles southeast of the historic capital of Virginia, Richmond. Main duties of this position include all aspects of propagation and culture of freshwater mussels for restoration of the Dan River in North Carolina and Virginia. This job announcement closes on March 6, 2018. Please see below and open the link to apply or gain additional information about the USFWS and/or the position.

Biological Science Technician (Fisheries)

Responsibilities

- Assists in the culture of freshwater mussels and warmwater fishes within recirculating and flow-through aquaculture systems, as well as culture ponds; sorting and enumerating animals; calculating and adjusting feed levels.
- Assists with conducting aquaculture experiments, tests, and trials.
- Field work to collect freshwater mussels and wild fish, and release animals into the wild.
- Collects and maintains detailed records of various biological, chemical, and physical data.
- Assists with maintenance and repair of equipment and hatchery infrastructure, grounds upkeep, and public outreach activities.

Open & closing dates: 02/28/2018 to 03/06/2018

This job is open to: The public

Salary: \$33,394 to \$43,414 per year
