Subject: Job Notice: Ecohydrology Seasonal Research Worker, southwestern GA

The Joseph W. Jones Ecological Research Center invites applications for a full-time, temporary Seasonal Research Worker. The 28,500-acre Research Center is located between Albany and Bainbridge, Georgia. The Center's research, education, and conservation programs focus on ecology and natural resource management. The site includes 16,000 acres of longleaf pine forests, over 1,000 acres of wetlands, and 26 miles of stream and river ecosystems. Further information can be found on the web site at https://urldefense.proofpoint.com/v2/url?u=http-3A__bit.ly_jones-5Fcenter&d=DwIF-g&c=Ngd-ta5yRYsqeUsEDgxcqsYY1Xs5ogLxWPA_2Wlc4&r=e2OJ1azRFn8thJzb2HxZT0AqoiqLvxfeeATyN59ZLoI&m=Dtw5VJunIVM3a7_js1P7NrKbpQ09pvIfDhZCOAQ87S0&s=XvBsbr_Mj7eK1TIKp4s_dRscY-rWCd3R7QrCMMOdamE&e=.

This position will begin in early April 2018 and continue through September 2018 with the possibility of extension depending on performance and funding. This employee will assist research staff and graduate students in the Ecohydrology Lab with a variety of field and lab studies. The Ecohydrology Lab conducts research focused on the intersection of upland longleaf pine forest dynamics and hydrology at local and regional scales. The employee's primary duties will center on assisting with routine lab field work and sample processing, as well as graduate research projects. Duties may include: 1) frequent, routine measurements of throughfall and stemflow; 2) litter sample collection and processing; 3) insect trapping, sorting, and pinning; 4) assistance with construction, installation and maintenance of sap flow probes and meteorological sensors; and 5) data entry.

Job Requirements: The successful candidate must be willing to conduct sometimes strenuous physical activity under demanding field conditions (i.e., heat, high humidity, and insects) and to work with minimal supervision.

Qualifications: Bachelor's degree in biology, ecology, forestry, natural resources management or a related field is preferred. Experience or coursework in ecohydrology, forest hydrology and/or plant physiology is a plus. Prior experience working in remote field settings is highly desirable. The optimum candidate will also have the motivation and ability to master the safe and proper operation of complicated field instrumentation.

Wages: \$9.00-\$11.00 per hour with housing
\$10.00-\$12.00 per hour without housing
(Rate will depend on qualifications)
Limited on-site housing is available.

A letter of application, resume, college transcripts (unofficial copies are acceptable) and list of references should be emailed to: jobs@jonesctr.org Subject: Ecohydrology Seasonal Research Worker (please use exact wording in subject line, otherwise your application may be overlooked). Applications may also be sent by mail to: Cindy Craft, ATTN: Ecohydrology Seasonal Research Worker, Joseph W. Jones Ecological Research Center, 3988 Jones Center Drive, Newton, GA 39870 or by Fax to (229)734-4707. Specific questions regarding the position should be sent to the Ecohydrology Lead Technician, Stribling Stuber (stribling.stuber@jonesctr.org). Applications received before March 1, 2018 will receive highest consideration. The Joseph W. Jones Ecological Research Center is an equal opportunity/affirmative action E-verify employer.
