## **COMMODITY FLOW SURVEY WORKSHOP**

**APRIL 2–3, 2020**

**THE KECK CENTER OF THE NATIONAL ACADEMIES  
WASHINGTON D.C.**

The **Commodity Flow Survey (CFS) 2020 workshop** will facilitate discussion among federal, state, and local level planners, as well as transportation researchers, academics, and practitioners that use federal freight transportation data. The workshop is an opportunity for data producers and data users to work together to find more efficient ways to align the CFS with other datasets such as the Freight Analysis Framework. Improving federal freight data programs will help planners better understand freight movements and consequently better address emerging issues.

**Primary issues of interest:**

- Benefits and trade-offs of freight flow attributes
- Modifying data collection and products
- Use of administrative records and other non-survey data sources
- Blending datasets
