Intro to IPUMS NHGIS: Geographic U.S. census data, time series & crosswalks

2020 Census Data will be released early next year. Where have population shifts occurred and how has the demographic makeup of these areas changed?

To answer these questions, the Tennessee State Data Center and TNGIC are excited to welcome Jonathan Schroeder to discuss historical census information and “crosswalk” techniques to compare areas with dissimilar boundaries.

Jonathan Schroeder

Research Scientist,
IPUMS Center for Data Integration
at the University of Minnesota
