passionately driven,  
**PURPOSEFULLY  
DIFFERENT**

### Short Term Internship

- One to two weeks
- Flexible Scheduling
- Time spent in all departments, then focus on one department that appeals to you most
- Work with lidar, photogrammetry, and GIS data
- Software programs include: ESRI, Bentley MicroStation, GeoCue, AutoCAD, Photoshop, Global Mapper, amongst other software suites
- Great opportunity to gather insight on how geospatial data is used for production purposes

### Long Term Internship

- One to three-month long paid internship
- Time spent in all departments, then focus on one department that appeals to you most
- Work with lidar, photogrammetry, and GIS data
- Software programs include: ESRI, Bentley MicroStation, GeoCue, AutoCAD, Photoshop, Global Mapper, amongst other software suites
- Ability to earn credits towards your degree (pending approval and clearance from your University)
