# Geospatial Field Methods of UAVs, Lidar, and GPS

GEOG 313
Fall 2021

GEOG 313 provides hands-on experience in using UAV, LiDAR and GPS to obtain, process, and analyze geospatial data. It includes the field and lab components. The field component teaches how to use the UAV, LiDAR, and GPS equipment to obtain data. The lab component teaches how to process and analyze the data. This course only meet once a week on Friday afternoon from 2:00 to 4:30 pm

Prerequisites: GEOG 311 or by instructor permission
Instructors: Yingkui Li, Nathan McKinney
Email: yli32@utk.edu
