# Geospatial Field Methods of UAVs, Lidar, and GPS

GEOG 313
Fall 2021

Interested in learning how to fly drones (UAVs) and use LiDAR? Want to learn how to apply these technologies to create interesting, 3-dimensional maps? GEOG 313 is the class for you! In this course, we will explore the applications of drones, LiDAR, and GPS to obtain, process, and analyze geospatial data.

Instructors: Yingkui Li, Nathan McKinney
Class meet: 2:50 to 4:05 pm Tuesday & Thursday
Prerequisites: GEOG 311 or by instructor permission
Email: yli32@utk.edu
