

# GEOG 433

## Landform Analysis and Landscape Planning Fall 2021

Interested in surface processes and natural disasters related to landscape planning, such as landslides, flooding, sediment transport, soil erosion, and human impact on environment? GEOG 433 is the class for you. This course helps you understand the scientific knowledge of surface processes, learn the principles and methods to mitigate natural disasters and human impact on environment, and acquire “real-world” techniques for landscape planning.

Class meet: 9:50–11:05 am Tuesday & Thursday

Prerequisites: GEOG 132 or instructor permission

Instructor: Yingkui Li

Email: [yli32@utk.edu](mailto:yli32@utk.edu)
