

# Geography 517: Geodatabase Design

(Geographic Information Management and Processing)

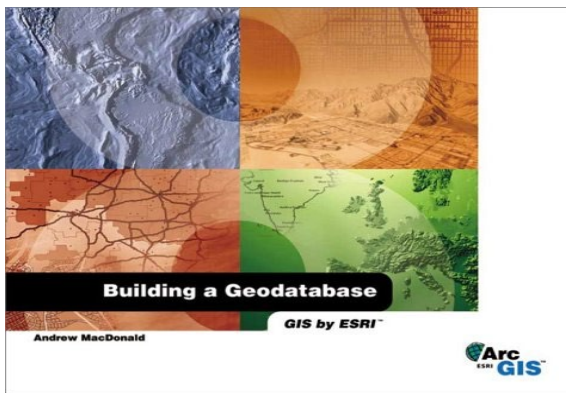

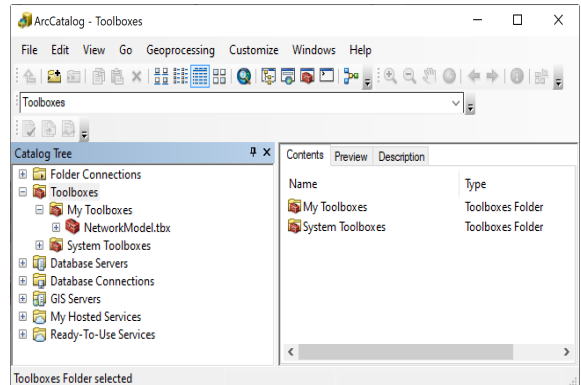

Spring Semester 2022, 1:10 – 2:25 PM on Tuesdays & Thursdays

Dr. Shih-Lung Shaw, Department of Geography, UTK

- Do you have your own data and need to create your own GIS databases?
- Do you know how to use ArcCatalog in ArcGIS to create geodatabases?

- Do you know the geodatabase model supports an object-oriented data model, which can represent entities as objects with properties, behavior, and relationships?

- Come to learn how to use ArcGIS software to create your own geodatabases such that you can perform various analysis and visualization functions on your own data!

Both undergraduate and graduate students who have taken GEOG 311 or an equivalent course are welcome to take this course! Contact Dr. Shih-Lung Shaw at [sshaw@utk.edu](mailto:sshaw@utk.edu) for additional information.
