

Still need another Fall class? Still seats available in:

GEOG 331 Natural Hazards

MWF 9:10–10:00a Section 002 CRN#: 52789

Face-to-Face

Instructor: Nicholas Grondin, M.S.

Questions???
ngrondin@vols.utk.edu

You should take GEOG 331 if you want to:

- *Learn* about the science of our world's hazards: when, why, where, and how they occur.
- *Understand* how we as humans prepare for these hazards to protect life and property.
- *Critically think* about the human impact of hazards.
- *Enhance skills* in scientific literacy and apply them to real-world events.

No prerequisites, but GEOG 131 or 132 provide a great background.

Counts toward: Geography major, Geography minor, Broadcast Meteorology minor, Global Challenges perspectives requirement, VolCore: Natural Sciences Non-lab, Connection Packages: Environment and Society, Humans Living on a Dynamic Earth, and Understanding Climate Change, and more!
