

Fall 2022

TTH 12:55PM – 2:10PM BGB 206

Instructor: Mayra A. Román Rivera
mromanri@utk.edu

Want to have more “real-world” GIS experience?

This is a community engaged learning course. Students will be exposed to challenges facing local community organizations. Working collaboratively, students will use their experiences and draw on their collective understanding of interdisciplinary perspectives to plan, develop and implement a GIS project that satisfies the needs of a community organization.

In the past we have worked with organizations such as the Beck Cultural Center, SOCM, TDEC, UTCEO and more!
