

Edge of Space Academy

A paid undergraduate summer research experience centered around space-based instrumentation for observing Earth and space.

Students will build small instrument payloads integrated onto drone and high-altitude aerial platforms to take measurements of the Earth below and the atmosphere and space environment above.

No prior experience in hardware, instrumentation, or electronics is necessary. This hands-on experience is designed for all students who have an interest in Earth, atmospheric, solar, and space science.

July 12 -29, 2023

Iowa City, Iowa

Application Deadline: Wednesday, January 25, 2023
