
Auburn University Job Description

Job Title: **Regional Director, AES**

Job Family: No Family

Job Code: **GA23**

Grade AF18 \$67,500 - \$121,500

FLSA status: Exempt

Job Summary

Reporting to the Director, Experiment Station Research Operations, directs operations of multi-disciplinary research efforts across a designated region, consisting of multiple experiment stations. Responsible for supervising the Associate Directors at each experiment station within their region. Serves as liaison between College of Agriculture faculty and experiment station Associate Directors.

Essential Functions

1. Develops and manages regional research plans related to cattle, crops, and horticulture. Coordinates with Director of Research Operations, station Associate Directors, and faculty to allocate and approve field research within the region. Develops and implements quality control measures to ensure high quality results from research effort. Partners with departmental and Alabama Cooperative Extension System (ACES) staff personnel to ensure dissemination of results.
2. Assists in the development and allocation of regional budget to ensure financial integrity. Correlates regional spending to research output and promotes revenue generation to enhance regional budgets. Manages regional reserves to improve facilities and equipment. Identifies extramural and alternative funding streams to benefit the region.
3. Provides leadership to the Associate Directors and administrative support to increase technical abilities of all station employees. Assists in developing employee recruitment and retention tools, as well as facilitating performance management programs to ensure employee development and recognition.
4. Manages assigned staff and leads recruitment of positions, including reviewing resumes, participating in interviews, and conducting performance review evaluations. Assists in resolving employee relations issues.
5. Serves as a liaison to Facilities Management personnel to inventory current facilities, as well as to plan and facilitate physical plant upgrades. Evaluates needs and communicates design requirements, assists in completing bid processes, monitors the construction phase, and provides input for project completion.
6. Collaborates with Associate Directors to identify equipment needs, and develops systematic plans for maintenance and replacement. Coordinates usage of high value assets, both within and across regions, to minimize equipment overlap and maximize usage. Identifies and evaluates the effectiveness of emerging technologies to improve station operations.
7. Promotes research efforts by coordinating with the Associate Directors and stakeholders to provide multiple field days, tours, and producer meetings within the region. Develops and provides material for social media and web content to CoA Communications and Marketing.
8. Responsible for monitoring and ensuring compliance of Institutional Animal Care and Use Committee (IACUC) regulatory guidelines for all designated regional stations.
9. May perform other duties as assigned by supervisor.

Supervisory Responsibility
