

TennesseeView Fellowships

\$500 for Your Remote Sensing Project!

The TennesseeView Fellowships aim to provide support, encouragement, and resources to students in Tennessee who are interested in pursuing a career in geospatial data science and remote sensing. These fellowships also aim to increase the awareness of geospatial technology in STEM education and workforce development.

Eligibility:

- Must be a current undergraduate, graduate, or post-baccalaureate student in a college or university in the state of Tennessee.
- Open to students from any discipline.
- Must have good academic standing.
- Working on a project that utilizes remote sensing and Earth observation. The project must be presented at a conference (e.g., TNGIC Annual Conference) before September 2024, and preference will be given to projects that have a positive impact on an identified organization, agency, or group.
- Must not have previously received the TNView fellowship.
- Financial need may be considered as a secondary criterion.

Application Checklist:

- Full name.
- Undergraduate or graduate status.
- Department and university.
- Phone number and email address.
- Name of faculty advisor.
- A cover letter of no more than 2 pages that clearly identifies the problem, its significance, the planned approach, and a stakeholder (e.g. a state agency, a community organization, a school or university, etc.).
- Your resume or CV.

Number of Awards:

- Graduate students: 3 fellowships available.
- Undergraduate students: 3 fellowships available.

Application Deadline: November 15, 2023
